

SIWES Logbook Assistant

Quick-Start Guide

Turn your messy daily work notes into a clean, professional logbook — plus weekly summaries, your full final SIWES report, and defense slides. No technical setup, no keys — just your details and you're ready.

New here? Start in under 2 minutes.

Fill your details, tell the assistant your day, and save it to your logbook.

What this app does

Every working day, just tell the assistant what you did at work in plain English — even rough, short or unordered. It rewrites your notes into a neat 35–70 word entry that fits the 'Description of Work Done' box in your SIWES logbook, and remembers everything for your weekly summaries and final report.

You never have to set up anything technical. There are no keys to get and nothing to configure — the assistant is ready the moment you sign in.

Getting started in 3 steps

1

Fill your details

Enter your name, school, course, firm, department and start date. This personalises your logbook, summaries and report. Only a few fields are required and you can edit them anytime.

2

Tell it your day

Type everything you did at work — messy is completely fine — and press Send. You get a clean, professional entry. Tap 'Save to logbook' to record it.

3

Build your records

Generate weekly summaries as you go, and when your placement is done, build your full final SIWES report — all from the saved entries.

Your logbook

- Open the Logbook tab to see your Weekly Progress Chart — it mirrors the real SIWES logbook page.
- Hover any day and tap Add/Edit to write or fix an entry by hand.
- Jump between weeks with the arrows or the week dots.
- Print your logbook, or download it as an editable Word (.docx) file to submit or copy into your official book.

Pro features

Pro unlocks everything you need to finish your placement and pass your defense:

- Generate Monthly Summaries.
- Build your full Final SIWES Report in the official NACOS format — title page, dedication, acknowledgements, all five chapters, references and appendix — then download it as Word.
- Generate your Defense Slide Deck (9 slides, 6x6 rule, with speaker notes) and download it as a designed PowerPoint.
- Attach photos and skill tags to each logbook day.
- Voice typing, writing-style presets, a daily streak and reminders.
- Smart diagrams (flowcharts, ER diagrams, architectures) for your report appendix.

Free trial & plans

- Try everything free for 3 days — just enter your matric number to start. No card needed.
- Basic (N1,500): your daily logbook and weekly summaries.
- Pro (N2,500): everything, up to the final report and defense slides.
- One-time payment for your whole placement — no subscription, paid securely via Flutterwave.
- Got an access code? Enter it on the sign-up form for instant access.
- Already paid but still locked? On the unlock page, enter the email you paid with and tap 'Restore my access'.

Tip: keep a backup

Your logbook lives in your browser. On the Profile page, tap 'Download backup' now and then, so you can restore it if you clear your history or switch phones.
